Non-contact Infrared Thermometer

MIT-7000

Specifications

Measuring distance	1-10cm	Measuring time	1s
Measuring accuracy	± 0.2°C (35-42°C)	Display	Color LCD
Measuring mode	Forehead and object	Memory function	32 groups of memory
Power Supply	2 AA battery	Power off	Automatic power-off in 1min without operation
Weight	105g	Size	145x98x38mm

Non-contact Infrared Thermometer

Infraeed thermometer
Effective distance: 5cm - 15cm
Measurement time: 0.5s
Power: d.c.3v

MIT-7000

Features:

- ≤1s rapid measurement
- Non-contact measurement, measuring distant: 1-10cm
- High accuracy: ±0.2
- Double measuring mode: forehead and object
- 20 groups of memory
- High temperature sound and light alarm, indicating abnormal body temperature
- High temperature alarm: Color LCD screen, green light shows normal temperature, red light shows higher than 37.5, orange light shows lower than 37.5
- Long beep (1s) when temperature is lower than 37.5°C
- 5 short beeps when temperature is higher than 37.5°C
